LF-3011VA	Red	6.8x13.0x5.0	5.08	8	Black	Anode common	1	OPS-S3010LR-D-BW			7.62	Black	Anode common	1	The LF-3011 series is special design in ROHM, if we follow ROHM's spec. to bending the pin to 90 degree, we concern the reliability, bending jig need to be custom and cause extra cost happenend. Accordingly, if the parts need to be 100% cross from ROHM's, we will not be able to support. Based on reliability concern, we would suggest the customer switch to SMD Display type. Or, we also can custom SMD Display as ROHM's spec., but the tooling cost will be happenend. More details, please contact: sales@opedtw.com LF-3011 系列的 PIN 針 角度是 ROHM 獨有的結構設計，若要與 ROHM 一樣將 pin 腳彎曲至 90 度。除了有信賴性的考量外，也必須另外開模彎腳治具。因此，如果您需求必須維持與 ROHM 一樣的彎腳方式及尺寸，這四款型號將無法供應。 也因為有信賴性的考量，建議客戶可改採用平面式 SMD Display 尺寸請參考左方 OPTO PLUS 型號及尺寸 或者，如果客戶可接受平面的 SMD DISPLAY，也可依 ROHM 的規格客製開模。
